CONTENTS

Preface
R.W. Grubbström and H.H. Hinterhuber xi

Production Planning and Control

Integrating material coordination and capacity load smoothing in multi-product multi-phase production systems
J.W.M. Bertrand and H.P.G. van Ooijen 1

Using metaheuristics for solving a production scheduling problem in a chemical firm. A case study
P. Fortemps, C.O.M. Pirlot, J. Teghem and D. Tuyttens 13

Concepts for improving scheduling decisions: An application in the chemical industry
K. Frauendorfer and E. Königsperger 27

Hierarchical decision-making model for planning and controlling stochastic projects
D. Golenko-Ginzburg, A. Gonik and S. Kesler 39

A multilevel decision-making system with multiple resources for controlling cotton harvesting
D. Golenko-Ginzburg, Z. Sinuany-Stern and V. Kats 55

Periodic production scheduling at a fastener manufacturer
V.E. McGee and D.F. Pyke 65

Managing and reducing total cycle time: models and analysis
J. Miltenburg and D. Sparling 89

Modelling production scheduling systems
G. Schmidt 109

Parallel machine scheduling with release dates, due dates and family setup times
J.M.J. Schutten and R.A.M. Leussink 119

Formulas of MRP
A. Segerstedt 127

Complexity and uncertainty of materials procurement in assembly situations
J.T. van der Vaart, J. de Vries and J. Wijngaard 137

Production planning in the case of uncertain individual demand: Extension for an MRP II concept
G. Zäpfel 153

Capacity planning and lead time management
W.H.M. Zijm and R. Buitenhek 165

Strategic Planning for Production Systems

Quantifying the relative improvements of redesign strategies in a P.C. supply chain
D. Berry and M.M. Naim 181

A framework for selecting and introducing appropriate production technology in developing countries
P. Bruun and R.N. Mefford 197

Evaluating designing principles of Japanese production systems
K.-D. Fröhner and K. Iwata 211

Responding to customer enquiries in make-to-order companies: Problems and solutions
B. Kingsman, L. Hendry, A. Mercer and A. de Souza 219

Evaluating manufacturing strategy formulation processes
K.W. Platts, J.F. Mills, A.D. Neely, M.J. Gregory and A.H. Richards 233
A new method for evaluating worst- and best-case (WBC) economic consequences of technological development
H. Schjaer-Jacobsen 241
Shaping the organization of order processing with the simulation tool FEMOS
G. Zülch and T. Grobel 251

Inventory Control
Stochastic lot-sizing: Solution and heuristic methods
N.P. Dellaert and M.T. Melo 261
Global inventory control in an academic hospital
N. Dellaert and E. van de Poel 277
Two replenishment strategies for the lost sales inventory model: A comparison
K. van Donselaar, T. de Kok and W. Rutten 285
Safety production plans in MRP-systems using transform methodology
R.W. Grubbström and A. Molinder 297
Optimal allocation policies in a two-echelon inventory problem with fixed shipment costs
R. Güllü and N. Erkip 311
Analysis of order-up-to-*S* inventory policies under cash flow market value maximization
K. Inderfurth and R. Schefer 323
An (*s, Q*) inventory model with remanufacturing and disposal
E. van der Laan, R. Dekker, M. Salomon and A. Ridder 339

Theoretical Approaches
Transfer pricing of a service department facing random demand
S.G. Johansen 351
Optimal (*r, Q*) inventory policies with Poisson demands and lost sales: discounted and undiscounted cases
S.G. Johansen and A. Thorstenson 359
The marking for bucking under uncertainty in automatic harvesting of forests
E.P. Liski and T. Nummi 373
Optimization of cyclic manufacturing systems with stochastic manufacturing times using event graphs
N. Sauer 387

Productivity and Performance Analysis
A coherent methodology for productivity analysis employing integrated partial efficiency
P.J. Agrell and J. Wikner 401
Input congestion in loan operations
T.E. Hartman and J.E. Storbeck 413
Performance measurement system design: Should process based approaches be adopted?
A. Neely, J. Mills, K. Platts, M. Gregory and H. Richards 423
Choice of metric in the measurement of relative productive efficiency
P.C. Ritchie and J.E. Rowcroft 433

Product Pricing and Costing
Product costing in ten Swedish manufacturing companies
P. Alnestig and A. Segerstedt 441

Life-cycle cost analysis of the labor factor
P. Dehlén and G.S. Bolmsjö 459
Cost of free capacity
J. Paranko 469

General Production Economics
An analysis of research on international operations networks
T. Boone, S.P. Johnson, M. Sisk and D.C. Whybark 477
Services provided by manufacturing: The Hungarian case
A. Chikán and K. Demeter 489
American health care reform: An international perspective
J.R. Minifie and V.L. West 497

Flexible Manufacturing Systems
An analytical approach to process planning with rework option
L. Abdel-Malek and N. Asadathorn 511
Tool sharing in parallel part production
G.J.C. Gaalman and W.M. Nawijn 521
Workload control concepts in job shops A critical assessment
M. Land and G. Gaalman 535
Strategic FMS design under uncertainty: A fuzzy set theory based model
G. Perrone and S.N.L. Diega 549
Guidelines for tool store dimensioning in flexible manufacturing using an analytical technique
L. Zavanella 563

Quality Planning and Control
What and how about quality function deployment (QFD)
C.P.M. Govers 575
Inspection and correction policies in setting economic product tolerance
D. Irianto 587

Transportation and Logistics
Storage location assignment: Using the product structure to reduce order picking times
H. Brynżer and M.I. Johansson 595
A decision support system for strategic issues management of logistics
J. Korpela and M. Tuominen 605
Computer-aided packing shop scheduling in a manufacturing plant
A.G. Lagodimos, A. Charalambopoulos and A. Kavgalaki 621

Diary of Events 631
Author Index to Volumes 46 and 47 633
